Kalari Kovilakom

Neurological Disorder – 14N

Kalari Kovilakom offers personalised Ayurvedic care for neurological conditions through traditional treatments, physician supervision, prescribed herbal medicines, a customised sattvic diet, yoga and meditation. The approach begins with a detailed medical assessment and an evaluation of the individual's condition, symptoms and mobility needs. Depending on the physician's recommendations, therapies may include Abhyanga (therapeutic oil massage), Shirodhara, Pizhichil, and other condition-specific Ayurvedic procedures. The programme aims to support comfort, relaxation, mobility and overall well-being, with the treatment plan and duration determined individually.

Neurological disorders such as Parkinson's disease, stroke and progressive nerve conditions require appropriate neurological medical care. Ayurvedic treatment should be considered complementary and should not replace prescribed medication, rehabilitation or specialist follow-up.
