Sanjeevanam Ayurveda Hospital

Psoriasis – 14N

The Psoriasis Treatment Programme at Sanjeevanam Ayurveda Hospital focuses on supporting skin health and managing psoriasis symptoms through an individualised Ayurvedic approach. Depending on the patient's condition and the physician's assessment, the treatment plan may include traditional Ayurvedic therapies, prescribed herbal medicines, medicated oil applications, dietary guidance and lifestyle modifications. The programme aims to help manage symptoms such as itching, redness, dryness and skin irritation while promoting overall well-being. The treatment approach and duration are determined according to the individual's health needs and severity of the condition. Psoriasis is a chronic skin condition, and Ayurvedic care should complement appropriate dermatological treatment.
